## 3D Wall Installation System

New patented installation system enabling three different levels of panels to connect for the creation of an amazing 3D effect on walls.

Suitable for all materials, this unique system facilitates easy and fast installation. Panels are connectable on three different levels offering endless design opportunities and striking results.

With more walls than floors in the world, this innovative installation system allows manufacturers to enter new markets as well as to expand their product portfolios.

### KEY BENEFITS

- Attractive new growth opportunity
- Easy to install and maintain
- Endless design opportunities
- Suitable for all materials
- Moisture and heat resistant joints

## Click-System for Wall and Ceiling Panels

The wall and ceiling panel click-system is an innovative profile providing variable joint options for easy installation and diverse design possibilities.

The profile's flush joint and a space on the long side enables either concealed or visible joints or a combination of both. The system is suitable for all materials and can be used to install panels on walls and ceilings.

Flooring manufacturers can leverage their existing designs and broaden their existing offerings by launching new collections combining flooring, walls and ceilings.

### KEY BENEFITS

- Leverage existing designs
- New collection combinations
- Mix and match design possibilities
- Easy to install
- Suitable for all materials
- Moisture and heat resistant joints

## Partnering with the Best

I4F is a group of companies providing patents and technologies to the flooring industry and we are focused on the future!

By partnering with the world's leading producers and innovators in flooring technologies, we are powering new development by combining innovation and patented technology to deliver future-driven solutions for the benefit of our licensees.

I4F has a global strategic partnership agreement with Kronospan - the world's largest manufacturer of wood-based panel products and a leader in the production of laminate flooring.

I4F has the licensing rights for Kronospan's one thousand-strong patent portfolio including Kronowall 3D and Kronospan wall and ceiling installation systems, flooring locking, board compositions and production as well as digital printing.
